Welding Shop

Experiment - 1

Objective:

- 1) To study arc welding processes including arc welding machines (AC and DC) electrodes and equipments
- 2) To join 2 metal pieces of metal by arc welding process

Job Assignment

- 1) To make sketches of different arc welding machines and equipment studied
- 2) To describe specification and selection of electrode
- 3) To learn about welding precautions
- 4) To make following joints by arc welding
 - Lap joint
 - Butt joint
 - Butt joint double vee
 - L-joint
 - Butt joint single vee

Tools and Instruments

1) ~~Sp~~ goggles:

Used to protect the eyes of the welder from the light sparks produced during welding

2) Face shield:

Protects eyes from sparks during welding normally held in hand
